

Proposals for a new waste facility for Cheshire

About this exhibition

This exhibition provides you with important information about Viridor's proposals for a new waste facility at Lostock Works, off Griffiths Road, Lostock Gralam. This proposal has been developed as part of a wider consultation by Cheshire Waste Disposal Authority.

The new Cheshire West and Chester and Cheshire East authorities are seeking an alternative sustainable waste treatment option for residual household waste. Viridor, one of the leading recycling and waste management companies in the UK,

Your say

Please take this opportunity to talk to the Viridor team here today. Ask questions, find out more information and give your views on the proposal.

You can pick up a leaflet, which contains a form for your feedback or visit our website

is one of two bidders that have been shortlisted for the final stage Cheshire's Household Waste PFI Contract.

This proposal will meet Cheshire's waste management requirements for the next 25 years.

Our aim is to improve services so that the 200 – 230,000 tonnes of residual waste currently produced by Cheshire each year is managed in the most economical, environmentally responsible and sustainable way.

Your views will be taken into account during this consultation period and may be incorporated into our planning application.

Conclusion

Through the proposed development of the MBT waste facility at Lostock Gralam we are committed to providing Cheshire with the best available waste management and recycling facilities to meet the current and future needs of local residents.

Our proposed development will ensure that Cheshire leads the way in sustainable waste management and fully supports existing waste reduction and recycling initiatives whilst making use of materials that would otherwise be sent to landfill. It will also create and protect employment for local people.

We think the most effective solution for Cheshire is to build a waste treatment plant that can efficiently and effectively process refuse with minimum disruption to the surrounding neighbourhoods.

We aim to raise awareness of the importance of recycling, best practice waste management and renewable energy. As part of our proposals we intend to create a centre of excellence for learning in the form of a waste education & visitor centre.

It is very important to us to work with the local community. Your views and suggestions are important to us and may help to shape our proposal, so please do take the time to speak to our representatives today and ensure your opinion is heard.
